**Patient Portal**

**Spring 2017**

**Website:** <https://patientportal.comeze.com>

*The PATIENT PORTAL is a web application that manages electronic patient records to provide rapid and efficient means to handle medical information of a clinic. Traditionally, a clinic uses paper-based patient records, which are expensive and take up space to maintain. Moreover, filing, retrieval of, and re-filing paper patient records are more labor intensive and less efficient compared to the electronic patient records. Using the PATIENT PORTAL shall alleviate these problems. The overall goal of the PATIENT PORTAL is to provide physicians, nurses, and clinical staff with a powerful, easy-to-use tool that securely assists them in gathering, storing, and manipulating Patients' information.*

- *Developed in PHP*
- *Used MySQL databases*
- *Included User Profiles*
- *Easy to maintain*
- *Secure*

**Child and Adolescent Policy Research Institute and The UTSA Mexico Center  
Summer 2017**

**Websites:** <http://capri.utsa.edu/> <http://mxcenter.utsa.edu/>

*The Child and Adolescent Policy Research Institute and The Mexico Center needed a new Website and I was in charge of creating it. Using WordPress and with some help from Giles-Parscale and The University of Texas at San Antonio's Office of Information Technology. I was able to completely renovate their old site. I had to maintain constant communications with all parties involved (UTSA, CAPRI Administration, and Giles-Parscale).*

- CMS WordPress
- PHP, CSS, and HTML
- Easy to maintain
- Very User Friendly

### **Developer/Tester**

**Android Application- LawnTech  
Summer 2017**

*An android app which allows homeowners to connect with lawn mower workers. Both sides should be able to rate each other. The app will allow both side to see the location (within map overview) and time range (after request the mower) of the service, and decide on an appropriate price (to be determined by stakeholder). This will allow mowers to find business and upon their own hours.*
